SUMMARY

Creative and technical Computer Science graduate with hands-on experience in game design, 3D assets, and interactive systems. I enjoy creating fun and engaging player experiences, especially in free-to-play games, and I have worked with Unity, C#, and design tools in both the art and programming side of development. I am excited to keep learning and contribute to your company.

EDUCATION

ITE Central College - Higher Nitec 2016 - 2018

- Higher Nitec in Games Art and Design

Nanyang Polytechnic College - Diploma 2019 - 2022

- Diploma in Multimedia & Infocomm Technology

Singapore Institute of Technology (Digipen) - Degree 2022 - 2026

- Computer Science in Interactive Game Development and Design

EXPERIENCE

Monetary Authority of Singapore (MAS) Internship May 2025 - March 2026

Roles:

- Designed and built a web CloudWatch dashboard for the department, improving data visibility and UX
- Conceptualised, designed and animated a department mascot (polar bear)
- Produced a year-end infographic poster summarising team progress, showcasing data visualisation and visual communication skills.

Infocomm Media Development Authority Internship Oct 2017 - Jan 2018

Roles:

- Designed game assets and character costumes for an anti-cyberbullying game targeting students with special needs
- Conducted user testing sessions with students to gather gameplay feedback and iterated designs accordingly

SKILLS

knowledge: PHP , HTML, CSS, SQL, jetpack Compose

Coding languages: JavaScript, C, C++, C#

Tools and Softwares (Tech): Git, Vs code/Vs, Unity

Tools and Softwares (Design): Figma, Photoshop, Adobe XD, Canva, Maya, Blender, Procreate,

Soft Skills: adaptable, creativity, team-player, flexible

PROJECTS

Title: Boba Time, Game Development Year3 University

Description:

- Develop a fully playable 3D game using a custom engine, taking ownership of game mechanics design and the prototype built in Unity with C# with a team of 10

Role:

- Served as Art Lead: created the majority of 3D characters, backgrounds, and hand-drew 2D cutscenes, ensuring a cohesive visual identity throughout.
- Scripted game interactions and logic directly in the team's custom engine and Unity

- Balanced both visual and functional responsibilities, delivering a polished player experience within a structured team environment.
